How to Read the Building Paint Assignments

Each of Copper Creek's 39 residential buildings has been assigned one of four paint schemes. The schemes are distributed throughout the community to create a balanced variety of colors, while minimizing, where practical, the use of the same scheme on visually adjacent buildings.

Use the **Building Color Scheme Assignment Map (page 3)** to locate your building number and identify its assigned **Scheme #1, #2, #3, or #4**. Then refer to the corresponding scheme examples to see the Sherwin-Williams colors and where each color will be used. The **Cabana has its own Scheme #5**.

Please Note: Paint schemes are assigned by **building, not individual home address**. Colors shown on this website and in the project materials are for general reference only. **Actual paint colors may vary from what appears on your screen due to differences in monitors, displays, lighting, photography, and digital color reproduction**. For the most accurate representation of the selected colors, please refer to actual **Sherwin-Williams color samples/chips and the specified Sherwin-Williams color numbers**.
